First Semester 2016-2017

- ✓Economics of Money & Banking
- ✓International Trade
- ✓Natural Resources & Environment
- ✓International Economic Relations
- ✓Modern Chinese Economy
- ✓Time Series Analysis & General Linear Models

EC 113

Economics of Money and Banking

This is a systematic treatment of the determinants of money supply, volume of credit, and monetary theory. Topics include economic analysis of credit markets and financial institutions in the Philippines such as commercial banks, the Central Bank, rural banks, insurance companies, and agricultural credit cooperatives.

MWF 3:00 – 4:00 pm

SOM 203 (Section A)

Mr. Edwin E. Yaptangco

Prerequisites:

EC 102 and EC 112

EC 122

International Trade

This course introduces international trade theory and policy. Topics include a systematic treatment of traditional comparative advantage theory and new trade theory based on economies of scale. Emphasis is on the importance of the foreign exchange market using the asset approach to exchange rate determination.

TTH 12:30-2:00pm

Venue – TBA (Section A)

TTH 2:00 - 3:30pm

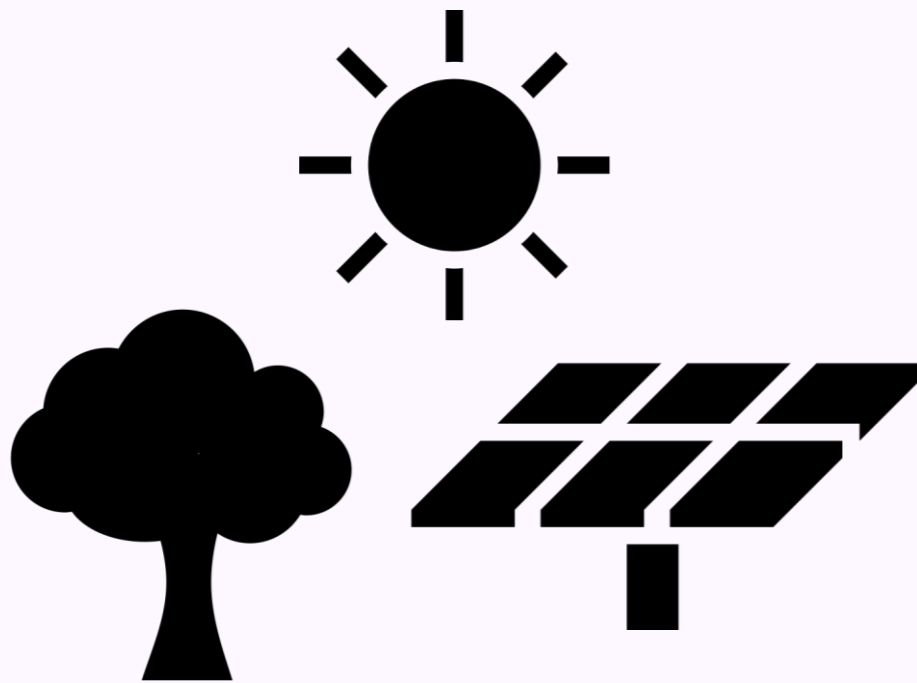

Venue – C114 (Section B)

Dr. Marissa Maricosa A. Paderon

Prerequisites: EC 102 and EC 111

EC 159

Economics of Natural Resources and Environment

This course studies the effects of economic activities on the environment and the policy tools to address environmental problems. Topics include the economic functions of the environment; the meaning of sustainable development; concepts of environmental rights and justice; and the important of environmental education.

TTH, 2:00 – 3:30 pm

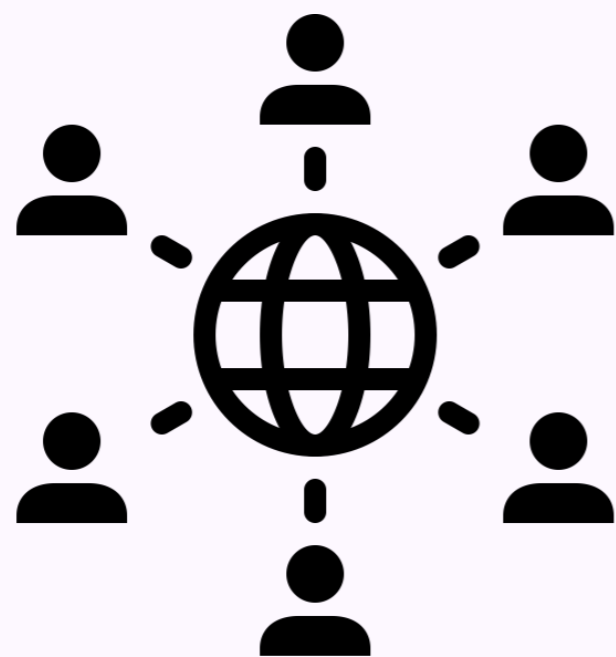

B308 (Section A)

Dr. Germelino M. Bautista

Prerequisite: EC 111

EC 185.2

Special Topics in Economics: International Economic Relations

This course explores various economic topics relating to the open economy, including a survey of international trade theories. Topics include controversial issues in the debate over trade liberalization, the role of international bodies such as the World Bank, and the importance of international factor movements.

TTH, 3:30 – 5:00 pm

BEL205 (Section A)

Dr. Emmanuel Jose C. Yujuico

Prerequisite: EC 102

EC 185.48

Special Topics in Economics: Modern Chinese Economy

This course is an introduction to the modern Chinese economy focusing on reforms undertaken to move from a centrally-planned to a market-oriented economy, and how it has increasingly integrated itself into the global economy.

MWF, 12:00-1:00 pm
SOM 205 (Section A)
Mr. Lucio Pitlo III
Prerequisites: None

EC 185.67

Special Topics in Economics: Time Series Analysis and General Linear Models

This course introduces time series analysis (ARMA and ARIMA processes) and general linear models (logistic regression and Poisson regression) that can be useful for doing research in economics. Students learn how to apply the statistical techniques using statistical software and interpret the results.

MWF, 11:00 – 12:00nn

Venue – TBA (Section A)

Mr. Len Patrick Dominic M. Garces

Prerequisite: EC 117 or Equivalent
